PROFESSIONAL SUMMARY

Full-stack software developer based in Maputo and final-year Information Systems student at ISCIM. I build complete web applications in PHP 8 (plain PHP and Laravel) with MySQL, JavaScript and Bootstrap, as well as desktop applications in Java. My projects include a live SaaS invoicing platform, a microcredit system with a financial engine and an agricultural marketplace, built with a focus on security, clean code and user experience. I am looking to join a development team, on-site or remote.

TECHNICAL SKILLS

Front-end: HTML5, CSS3, JavaScript, Bootstrap 5, React

Back-end: PHP 8, Laravel, Java, Spring Boot

Databases: MySQL / MariaDB, SQL, Firebase

Tools: Git, GitHub, GitLab, VS Code, Composer, Maven, XAMPP

Software engineering: Object-oriented programming, MVC and layered architecture, JSON APIs, Role-based access control, Web security (CSRF, prepared statements), Transactions and idempotency, Automated testing (PHPUnit)

PROJECTS

Sumbane Pay | Live

SaaS invoicing and sales management platform for small businesses in Mozambique, live online.

- Built the PHP 8 back-end (controllers, models, middleware and a JSON API), evolving it from a front-end-only first version.
- Implemented the multi-tenant model: a middleware isolates the data of each company, with plans and usage limits.
- Applied CSRF protection, prepared statements (PDO), login attempt limits and audit logging; PDF invoices with jsPDF.

Technologies: PHP 8 · MySQL · JavaScript · Bootstrap 5 · Chart.js · jsPDF
Live demo: sumbanepay.freehosting.dev | Code: github.com/jorgeSumbane22/SumbanePay

SumbaneCredit | In progress

Microcredit management system with an institutional website, client portal and admin panel.

- Built a financial engine with decimal arithmetic (bcmath and DECIMAL) for instalments, interest, fees and penalties.
- Ensured payment integrity with transactions, row locking, unique indexes, idempotency keys and daily reconciliation.
- Implemented 7 access roles with segregation of duties, PDF/Excel documents, queued notifications and PHPUnit tests.

Technologies: Laravel 12 · PHP 8.2 · MySQL · Bootstrap 5 · Chart.js · PHPUnit
Code: github.com/jorgeSumbane22/SumbaneCredit

AgroMercado | Completed

Agricultural marketplace connecting farmers and buyers in Mozambique.

- Implemented filtered search, a Fetch API cart and a transactional checkout that validates and reduces stock.
- Built separate areas for farmers, buyers and the SuperAdmin, with farmer verification and auditing.
- Applied prepared statements, CSRF tokens, HttpOnly/SameSite cookies and secure image uploads.

Technologies: PHP 8 · MySQL · PDO · JavaScript · Bootstrap 5 · Chart.js
Code: github.com/jorgeSumbane22/AgroMercado

CourtIQ MZ | In progress

Basketball management platform where several clubs use the same system independently.

- Built a modular PHP architecture with data kept separate per club in a single installation.
- Implemented five access roles (SuperAdmin, club admin, coach, player and fan), session management and activity logging.
- Built game, training and statistics management, plus a public portal in Portuguese and English.

Technologies: PHP · MySQL · PDO · JavaScript · HTML5 · CSS3

Code: github.com/jorgeSumbane22/CourtIQ-MZ
